About

First 5 Yuba

What We Do

First 5 Yuba invests in programs and partnerships that strengthen families, support early childhood development and build coordinated systems of care for children prenatal to age five. Guided by its strategic goals (Child Health and Development, Resilient Families, Quality Early Learning, and Strong Systems), First 5 Yuba works with community partners to expand access to health services, support parents, improve early learning opportunities, and strengthen systems. Through this collaborative approach, First 5 Yuba aims to ensure young children enter school ready to learn and thrive.

First 5 Yuba strengthens families, child development, health, and systems to help every child thrive from the start.

Vision

All Yuba County children are healthy and thriving in safe and nurturing family environments and ready to succeed in their educational experiences.

Mission

First 5 in Yuba County will strategically support the use of community resources and services to enhance the development and well-being of children 0 through 5 and their families.

Goal Areas

Child Health and Development

Promote each child's physical, dental, social, and emotional development.

Resilient Families

Promote parental resilience, social connections, concrete support in times of crisis, and knowledge of parenting and child development.

Quality Early Learning

Enhance early care and education settings to nurture children's health, socio-emotional, and cognitive development.

Strong Systems

Strengthen local systems to meet the needs of all children and families in a coordinated, high quality, sustainable manner.

Our Families

Child Ethnicity

First 5 Yuba serves a diverse group of children, with the largest share identifying as Hispanic/Latino.

Family Income

Over half of First 5 Yuba families report incomes below \$60,000, which is lower than median incomes for both Yuba County and California.

Caregiver Education

More than half of First 5 Yuba caregivers have completed some college or an associate's degree.

Caregiver Employment

Many caregivers are not currently in the workforce, with nearly half (44%) not looking for work and another 22% actively seeking employment.

Goal Area 1:

CHILD HEALTH AND DEVELOPMENT

What Are the Needs in Yuba County?

Dental Care

Percentage of Children (0-5) Attending Dental Visits in the Last Year

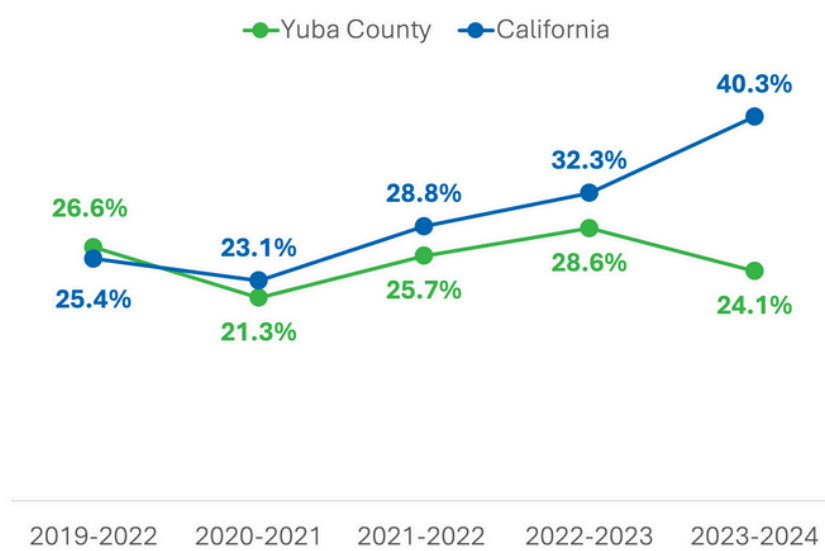

Source: CHHS - Dental Utilization Measures and Sealant Data by County and Age Calendar Year (2023).

Yuba County saw a sharp rise in dental visit rates in 2023, reaching the highest level in five years.

- Over half (54.8%) of Yuba County children ages 0-5 visited the dentist in 2023, a significant increase from 45.2% in 2022.
- Yuba County continues to exceed the statewide average (45.0% in 2023) for young children's dental care utilization.
- Dental visit rates have improved for three consecutive years in Yuba County, following a drop during the 2020 pandemic.

Developmental Screenings

Percentage of Children Screened by Age 3

Source: Medi-Cal Managed Care Quality Improvement Reports.

Yuba County's screening rates have remained steady in recent years, but continue to fall below the statewide average.

- In 2023-24, 24.1% of Yuba County children were screened by age 3, similar to the previous year's rate of 28.6%.
- Yuba County's screening rates have remained relatively stable over the past five years, ranging from 21.3-28.6%.
- Statewide screening rates have increased sharply, reaching 40.3% in 2023-24, widening the gap between Yuba County and California.

Well-Child Visits

6+ Well-Child Visits (0-15 Months)

2+ Well-Child Visits (15-30 Months)

Yuba County infants continue to attend well-child visits at strong rates, while toddler visits remain below statewide levels.

- In 2024, 52.6% of infants (0-15 months) received six or more well-child visits, similar to rates in 2022 and 2023.
- For toddlers (15-30 months), 59.1% received two or more visits in 2024, holding steady compared to recent years.
- While toddler rates remain below the state average, infant visit rates have stayed consistently high over the past three years.

How Is First 5 Yuba Responding?

MJUSD Student Services and Peach Tree Health Mobile Dental Clinic

MJUSD Student Services (SS) and Peach Tree Health (PTH) continued to deliver dental care services to children 0-5 years, particularly those residing in remote or hard-to-reach locations.

The fully equipped Happy Toothmobile provided comprehensive onsite services, including dental screenings, fluoride treatments, cleanings, sealants and more. In addition to direct treatment, staff offered oral health education and conducted outreach to increase awareness of the importance of oral health among children and caregivers.

The mobile dental clinic aims to increase the use of pediatric dental services and awareness of the importance of oral health.

The Happy Toothmobile, a fully equipped mobile clinic, provided dental screenings, fluoride treatments, follow-up care, and education across Yuba County.

Happy Toothmobile Equipment Upgrades

- New dental chairs
- Updated x-ray equipment
- Refreshed dental instruments

MOBILE DENTAL CLINIC SUCCESS STORY

Ahead of a Toothmobile school visit to Johnson Park, school staff contacted the dental team about two newly arrived families from Mexico with seven children between them. The children were in extreme need of dental care. Two children, a five-year old boy and a seven-year-old girl, were in especially urgent need with visible pain. School staff reported that they had been crying every day, unable to eat or sleep due to the pain.

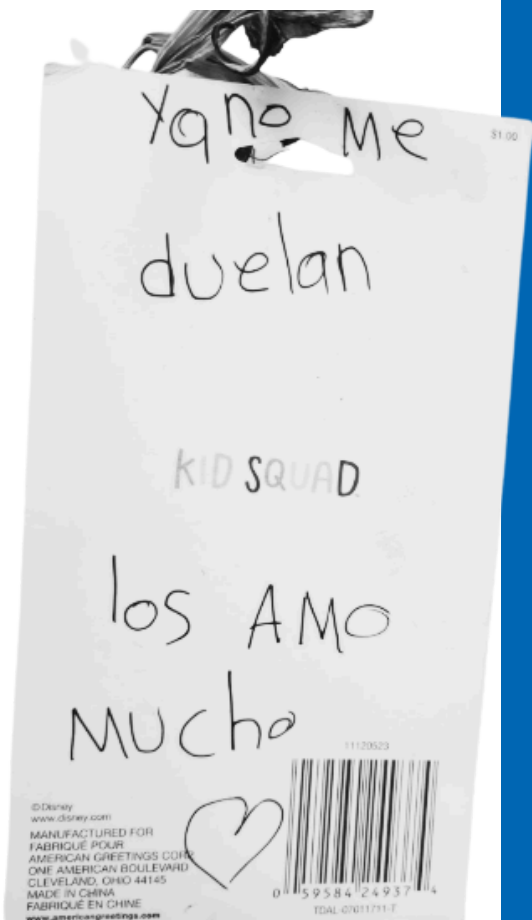

The boy received a root canal and three fillings. He was so excited that he could eat and drink without pain, and he even convinced a reluctant classmate to visit the Toothmobile. The boys became 'happy toof' buddies and loved coming to their dental appointments together.

The other child required antibiotics due to a bad infection. Her two infected teeth were removed, followed by six fillings and two pulpotomies (i.e., baby root canals). She was the most joyous, grateful little patient you could imagine, and so stoic and determined to become cavity-free. Every morning she would wait for the dental team to arrive with gifts of dandelions, drawings, and random trinkets. In one note she wrote, "To all the dentists who helped me so my teeth no longer hurt. I love you so much." (*Translation of original note shown*).

**To all the dentists
who helped me so my
teeth no longer hurt.
I love you so much.**

Although the dental team couldn't complete all treatments before summer break, the parents continued to bring the children for follow-up appointments during the summer. All seven children are now proud members of the Happy Tooth Zero Cavity Club.

-Program Staff

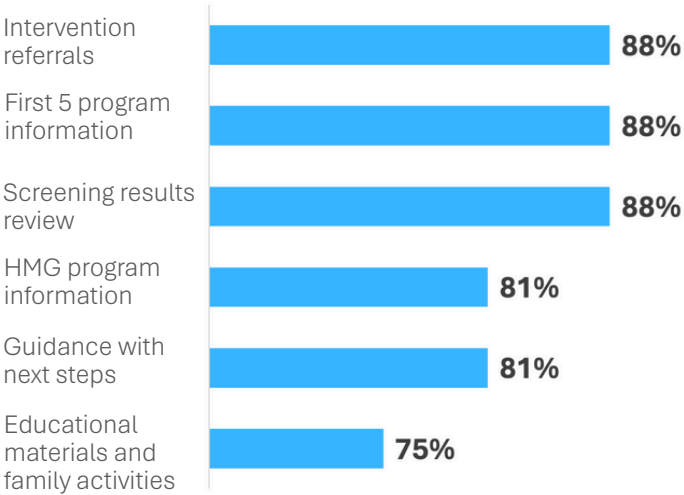

Help Me Grow Developmental Screenings and Referrals

Help Me Grow (HMG) is a national model of screening and early intervention services that was first implemented in Yuba County in 2016. HMG is a key partner in building a universal early screening system, and provides a centralized access point where families with young children can access information on local resources and services. HMG conducts screenings using the Ages and Stages Questionnaire (ASQ-3) and the Ages and Stages Questionnaire: Social-Emotional (ASQ:SE-2) to identify developmental concerns and connect families to early intervention services.

Parents reported strong satisfaction with HMG support and referrals.

Parent Satisfaction with HMG Navigation Services

Source: HMG Parent Navigation Survey, 2024-25. N=16. Note: Percentage of parents/caregivers rating survey items as very good (4) or best possible (5) on 0-5 scale, indicating satisfaction.

Help Me Grow connects families with developmental screenings and resources, helping them get timely support and intervention.

783

children screened

783

caregivers served

Developmental Screening Results at a Glance

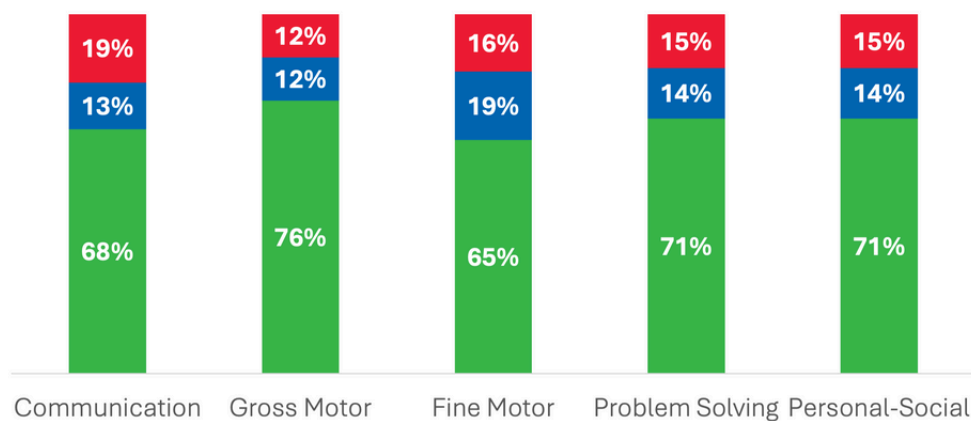

Fewer than half of children screened were on track developmentally, and a substantial share were flagged for potential developmental delays.

- 39% of children screened were on track with developmental milestones.
- 26% fell into “monitoring zone,” suggesting they may need follow-up.
- 36% were flagged for potential developmental delays and referrals.

Most children showed typical social-emotional development, though 1 in 3 may benefit from additional monitoring or support.

- 71% of children screened were within the typical range for social-emotional development.
- 13% were in the monitoring zone.
- 16% were flagged for possible concerns.

ASQ-3, By Domain

Screening results varied by domain, with most children on track for gross motor skills while communication and fine motor skills showed higher rates of concern.

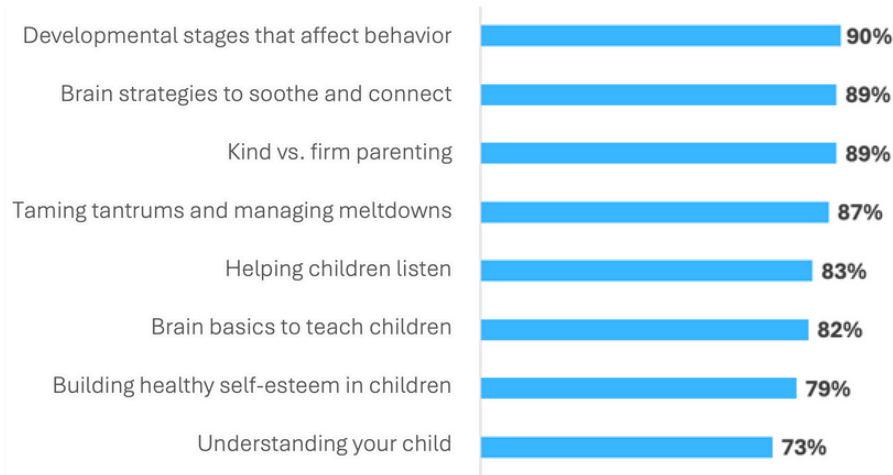

- Gross motor skills had the highest rate of children meeting developmental milestones (76%), with 12% needing monitoring and 12% flagged for possible concerns.
- Fine motor skills showed the greatest need, with 19% of children needing monitoring and 16% flagged.
- Communication skills followed a similar pattern, with 68% on track, 13% needing monitoring, and 19% flagged.

Child Development Behavioral Consultation Services

The Yuba County Office of Education’s (YCOE) Child Development Behavioral Consultation (CDBC) program provides brief intensive home-visiting consultation services to families struggling with child behavior management, and an evidence-based mental health curriculum for pregnant mothers. CDBC also offers several parent education series and community workshops in English and Spanish, on topics of positive discipline and child development. Lastly, CDBC facilitates Bi-County Early Access Support collaborative (BEAS) meetings for early childhood professionals and parents and coordinates developmental and behavioral events.

Caregivers in Positive Discipline workshops demonstrated strong understanding of parenting knowledge and strategies, scoring above 80% correct on most topics.

Knowledge (Percentage Correct) Following Positive Discipline Workshops

Yuba County Office of Education: Family Resource Center

The Yuba County Office of Education Family Resource Center (YCOE FRC) serves as a central hub of support for families and their children ages 0-5 with special needs. Services include linkages to early intervention and support, concrete assistance such as diapers and gas cards, workshops and support groups, and family activities.

What YCOE FRC Offers Families

One-on-One Support

Case management and guidance to help families access medical, developmental and special needs services

Basic Needs Assistance

Diapers and wipes; Gas cards/vouchers for medical appointments; Resource and toy lending library

Parent Education and Support

Workshops and parent support groups

Family Engagement

Playgroups, family activities, and community events

The YCOE FRC helps families navigate medical, developmental and day-to-day needs for children with special needs.

162 children and caregivers received one-on-one support

9,834 packs of diapers and wipes distributed

6 gas cards and vouchers distributed

Parent-Reported Knowledge Before and After YCOE FRC Activities

Parental Mental Health Initiatives

Stepping with Baby Walking Groups

Stepping with Baby is a weekly walking group for expectant and new mothers implemented through a partnership between YCOE FRC and First 5 Yuba staff. The program promotes physical activity, connects families to community resources, and provides a safe space for parents to learn about mental health, child development, and parenting while building relationships with other families.

“

It has helped build my confidence in learning that I wasn't alone, and that I am not the only one who deals with problems we as fathers sometimes face. Sometimes it's good to just talk about issues in a neutral environment with people who understand, and that alone can really feel uplifting. I've greatly benefited from the wise advice and conversations I've had with the other fathers

-Parent

Physical Fitness/Safety

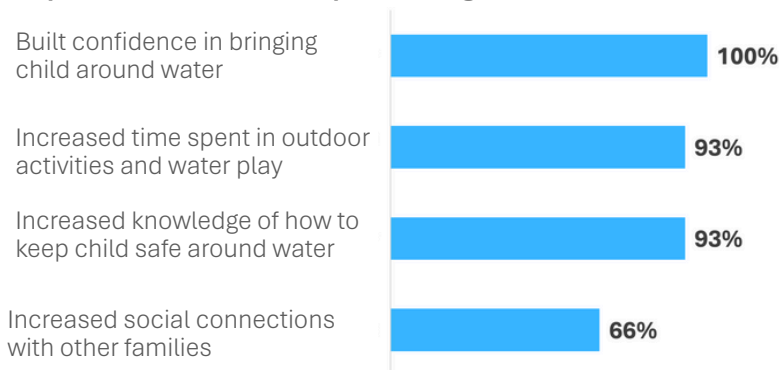

OPUD Aquatics Program

FIRST 5 partners with the Yuba County Department of Public Health to bring free swimming lessons to local families with children at the Olivehurst Public Utility District (OPUD) Swimming Pool. The braided funding allowed them to offer the full continuum of services to families with children, with First 5 supporting programming for ages 0-5 years and Public Health covering classes for older children. The program aims to increase child and family safety around the County waterways and reservoirs, strengthen parent-child bonding, and increase physical activity. Consecutive two-week sessions ran through the summer, 4-5 days a week.

OPUD Aquatics provides families with free swim lessons that help children and parents build water safety skills and confidence.

OPUD aquatics program increased parents' confidence and knowledge around water safety.

Percentage of Parents Reporting Positive Impacts from the OPUD Aquatics Program

Source: OPUD Summer Swim Survey, FY 2023-24, N = 15. Note: Percentages reflect participants who selected "Strongly agree" or "Agree."

My son gained more confidence being in a pool and now loves to swim. I feel more comfortable knowing he can reach the side of a pool and find a way out should he fall in.

-Parent

CA Office of Traffic Safety (OTS) Child Passenger Safety Program

Through funding from the California Office of Traffic Safety (OTS) and in partnership with Public Health, First 5 Yuba supported local efforts to keep children safe on the road. Certified child passenger safety technicians provided families with hands-on instruction, safety checks, and one-on-one car seat installation assistance. The program also distributed free car seats, hosted safety classes, and engaged families at outreach events, promoting awareness of traffic safety and proper car seat use.

The Child Passenger Safety Program helped Yuba County families keep their children safer on the road with free car seats, hands-on instruction, and installation support.

138 caregivers served

114 free car seats distributed

115 car seats purchased

146 car seat safety appointments completed

4 highly publicized child safety seat check-up events

8 safety education classes held

OTS SUCCESS STORY

Staff assisted a mom of a 6-month-old and 4-year-old who didn't speak English or Spanish. With the help of a phone interpreter, staff inspected her car seats and realized the seat belt straps were not locked. Staff demonstrated how to properly lock the seat belts and adjust the harness and the mother was able to do it herself. No replacement was needed for the baby's car seat.

The 4-year-old's seat, however, had no labels on the sides and the harness was twisted and frayed. The family had purchased the car seat on Facebook and didn't know its history. We issued a new car seat and demonstrated how to use the latch system. The mother even climbed into the back hatch to help pull the straps as tight as possible. Overall this was a great experience and we were able to support this family successfully despite the language barriers.

-Program Staff

A close-up photograph of a man and a woman tenderly kissing a baby on the cheeks. The man is on the left, with dark curly hair and a beard, wearing a light blue shirt. The woman is on the right, with dark hair, wearing a dark top. The baby is in the center, looking up with wide eyes, wearing a dark blue shirt with white suspenders. The background is a blurred green foliage.

Goal Area 2:

RESILIENT FAMILIES

What Are the Needs in Yuba County?

Poverty

Percentage of Children 0-5 Living in Poverty

Source: US Census ACS - 5-year estimates.

Nearly 1 in 4 young children in Yuba County live in poverty, a rate that continues to rise and remains well above the statewide average.

- The percentage of Yuba County children ages 0-5 living in poverty increased to 23.5% in 2023, up from 19.1% in 2021.
- Poverty rates in Yuba County have risen for three consecutive years and now exceed the statewide rate (15.1%).
- The gap between Yuba County and California has continued to widen, with local rates nearly 8 percentage points higher.

Food Insecurity

Percentage of Children (0-17) Who Are Food Insecure

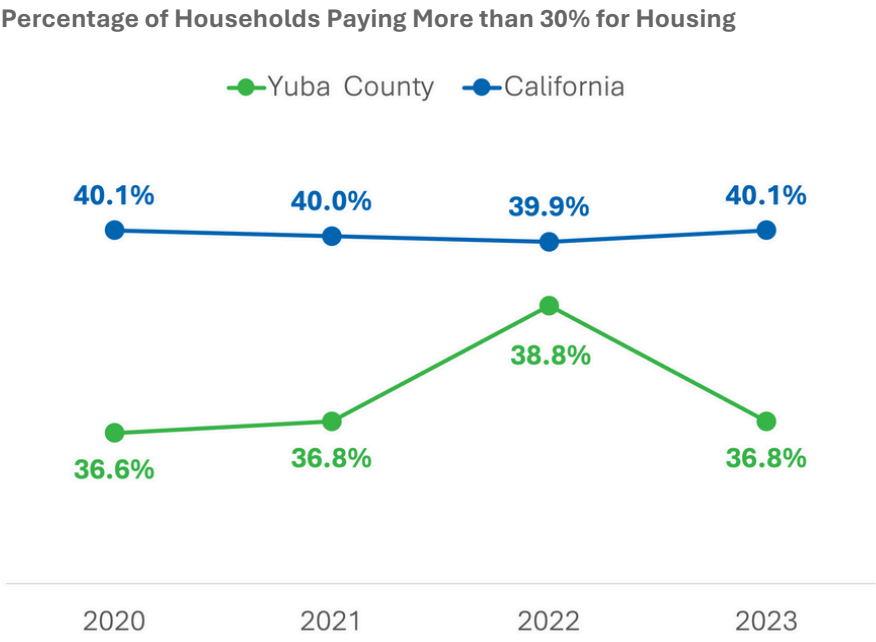

Source: Feeding America.

Food insecurity has increased in Yuba County, widening the gap with statewide levels.

- In 2023, 20.5% of Yuba County children under 18 years of age were food insecure, up from 15.6% in 2021.
- California also saw increases during this period, rising from 13.5% in 2021 to 16.9% in 2023.
- Despite similar upward trends, Yuba County rates have consistently remained higher than statewide.

Housing Affordability

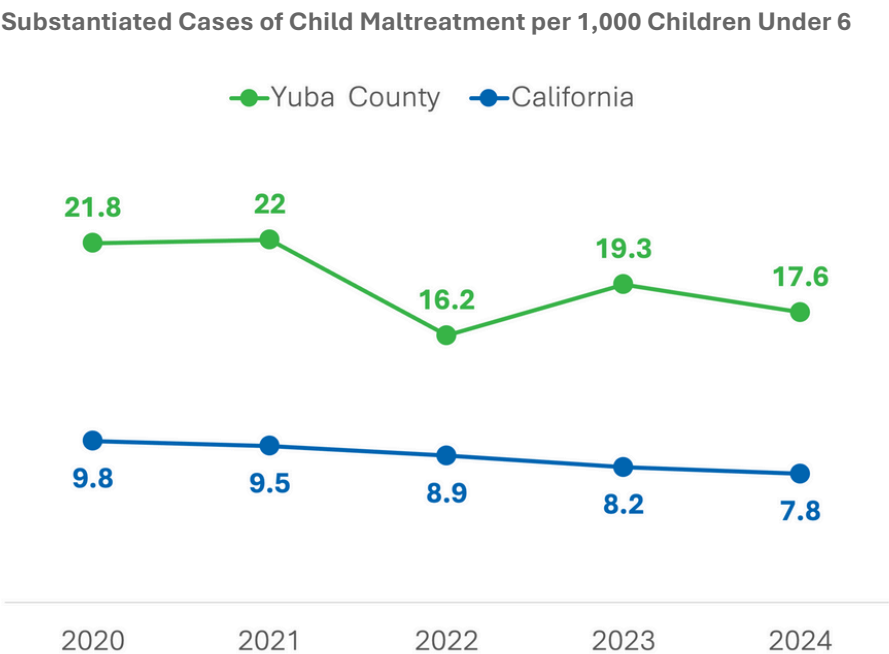

Source: US Census ACS - 5-year estimates.

About one-third of Yuba County households face housing cost burden, but the rate remains lower than California overall.

- Yuba County continues to experience a lower housing cost burden than the state overall. In 2023, 36.8% of Yuba County households spent more than 30% of their income on housing, compared with 40.1% statewide.
- The gap between Yuba County and the state has remained stable at about 3-4 percentage points.

Child Maltreatment

Source: UC Berkeley CCWIP.

While declining in recent years, Yuba County's maltreatment rates remain higher than statewide levels.

- Substantiated maltreatment cases in Yuba County have trended downward over the last three years after peaking in 2021.
- Yuba County continues to experience higher rates of substantiated maltreatment than the statewide average.

A Closer Look at First 5 Yuba Families

Family intake data offer insight into caregivers' concerns related to finances, food, and housing, and access to support.

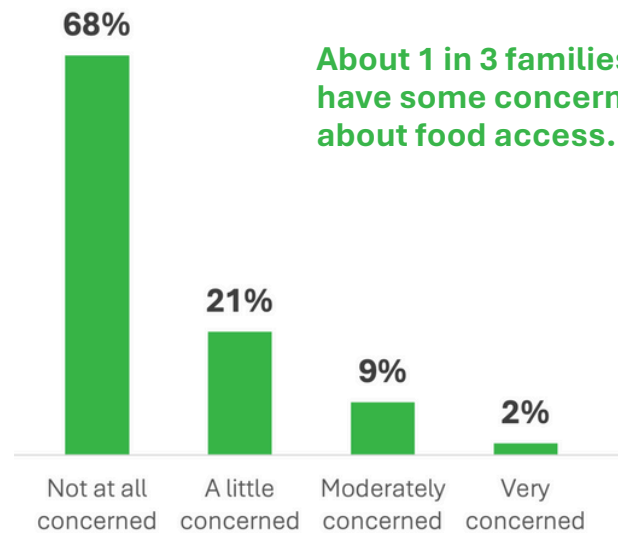

Money and Paying the Bills

More than half of families report some level of concern about money and paying bills.

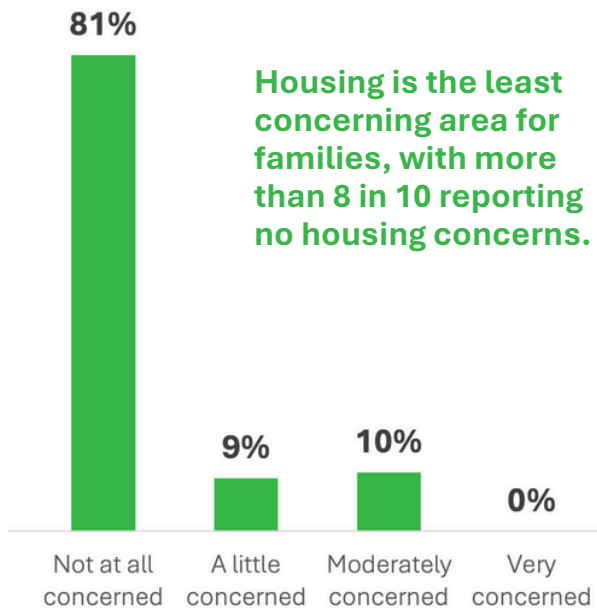

Access to Enough Food/ Healthy Food

About 1 in 3 families have some concerns about food access.

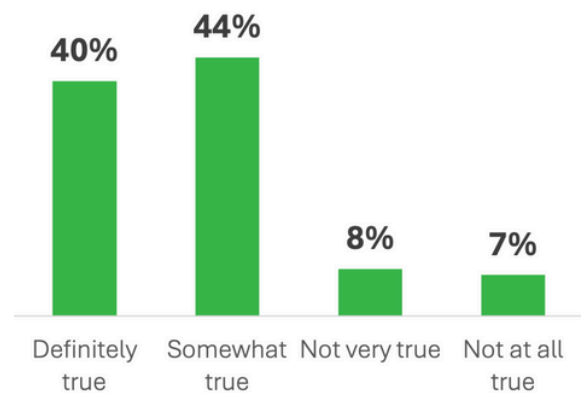

Housing Concerns

Housing is the least concerning area for families, with more than 8 in 10 reporting no housing concerns.

Knowledge of Where to Go for Basic Needs Support

Most families generally know where to go for basic needs help.

Source: Family Intake Form, 2024-25. N = 101-107.

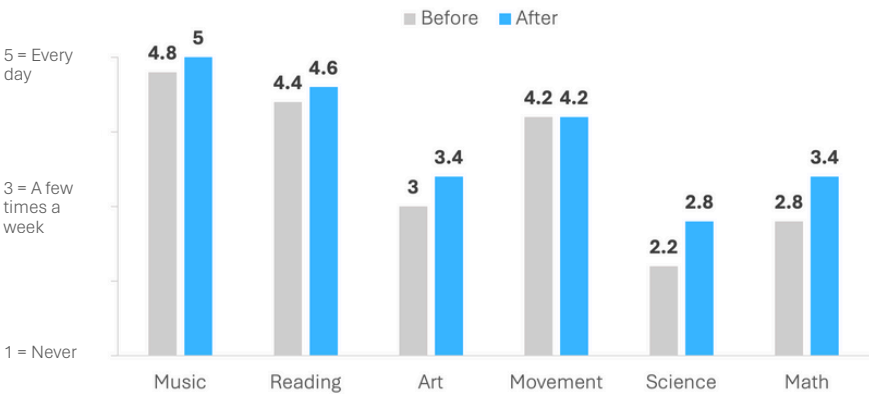

How Is First 5 Yuba Responding?

Playzeum Developmental Playgroups

Playzeum continued to bring Help Me Grow developmental playgroups to families across Yuba County. Playgroups offer hands-on, play-based early learning experiences for children and their caregivers to support parent-child relationships and school readiness. In addition, the playgroups offer opportunities for caregivers to share ideas, discuss concerns, and build connections.

Parents showed positive shifts in how often they engaged in learning activities with their children after attending playgroups.

Increase in Parent-Child Learning Activities After Playzeum Participation

ABC SPROUT SUCCESS STORY

When 2-year-old M and her mom first started coming to the program, M would scream, hit, pull hair, and have frequent fits or meltdowns. When I tried to get close to her mom, M would push me away or slap me. Her mom would either tell her "We don't do that," or apologize for her actions. My response was to give M the words she couldn't yet say like, "You don't want me by your mom" or "You want me to move."

We talked about how M doesn't have the vocabulary she needs and is likely getting frustrated when she can't express herself. We also discussed Conscious Discipline and strategies such as calming breaths while holding M.

The mom wasn't afraid to ask questions in class, and as the year progressed so did M and her mom. M wasn't having as many meltdowns as before, and they were much more minimal compared to before. Her mom was also using what she learned in the program out in the "real world." Watching their growth is a huge success because it means...it is something that parents need.

-Program staff

Camptonville Community Partnership: 1,2,3 Grow Parent-Child Classes

In the rural community of Camptonville, Camptonville Community Partnership (CCP) continued to bring learning and play to local families through its 1, 2, 3, Grow parent education and child enrichment program.

1, 2, 3, Grow is a parent-child early learning program that offers play-based enrichment, outdoor exploration, and evidence-based instruction to support children's physical, social-emotional and cognitive development and help prepare them for kindergarten. The program also offers parenting workshops on child development and behavior, giving parents practical tools to support their children at home.

Parents are satisfied with CCP parenting workshops.

I feel that 1,2,3 Grow is a valuable asset to our community and a much needed space for our youth and their growth. It is also a great space for parents to be able to make connections to one another and to know they are not alone on the parenting journey (it can be very lonely living out in the foothills).

-Parent

Goal Area 3:

QUALITY EARLY LEARNING

What Are the Needs in Yuba County?

Reading Proficiency

Percentage of 3rd Graders Reading at or Above Grade Level

Source: California Department of Education, DataQuest.

Reading proficiency in Yuba County continues to improve, with 3rd grade performance rising to 39.3% this year.

- Yuba County 3rd grade reading proficiency increased for the second year in a row, rising from 35.9% to 39.3% in the last year.
- California continues to outperform Yuba County at 44.2%, but the gap between county and state levels narrowed slightly in 2024-25.

Preschool Enrollment

Percentage of 3-4 Year-Olds Enrolled in Preschool

Source: American Community Survey 5-Year Estimates Detailed Tables, Table ID: S1401.

Preschool enrollment in Yuba County remains below the statewide rate, despite a slight increase this year.

- Preschool enrollment in Yuba County rose slightly in 2023 after several years of decline, increasing from 38.7% in 2022 to 41.0% in 2023.
- Yuba County continues to trail the statewide average of 44.4%.

A Closer Look at First 5 Yuba Families

Data from family intake forms highlight caregivers' access to child care and the types of early learning support they are seeking.

Child Care Access and Concerns

Caregivers Access to Informal Child Care

Source: Family Intake Form, 2024-25. N = 107-109.

Most caregivers (73%) have someone they can leave their child with while they run an errand.

Caregivers' Concerns About Child Care

1 in 3 caregivers have some level of concern about their ability to obtain child care to attend work or school.

More than half of children (56%) are cared for at home, while the rest attend licensed programs or are watched by family, friends, or neighbors.

56% of children are cared for at home with parents

21% attend a licensed preschool or child care

20% are cared for by family, friends, or neighbors

2% attend transitional kindergarten

1% attend a licensed family child care home

Family Reading Frequency

Percentage of Families Reading With Their Child 3+ Times per Week

Regular reading dropped to 57% this year, with fewer families reading to their child three or more times per week.

How Is First 5 Yuba Responding?

Keys to Quality

The Keys to Quality Stipend Program, offered through the Child Care Planning Council and funded in part by First 5 Yuba, strengthens the early learning workforce by providing stipends, training, coaching, and professional growth opportunities. The program supports licensed and license-exempt early learning providers, as well as Family Childcare Providers, and Family, Friend, and Neighbor providers, helping ensure young children receive high quality care.

91%

felt they became a better teacher because of the Keys to Quality Stipend Program

93%

found program materials and workshop resource very beneficial

Early Care Providers and Community Workshops

The Caregiver Café continued to be an important support for Family, Friend, and Neighbor (FFN) caregivers—grandparents, relatives, and close family friends who provide essential child care. The Caregiver Café offered approachable child development information, practical activities, and culturally responsive tools that caregivers could easily use in their daily routines. It also offered an opportunity for caregivers to form connections and linked them to local programs, family support services, and early childhood organizations.

First 5 Yuba also strengthened developmental support countywide by training home visitors and early childhood educators to use the Ages and Stages Questionnaire (ASQ). Following the training, participants demonstrated significant growth in their knowledge and comfort level of the ASQ tools.

Home visitors and early childhood educators attend an ASQ training.

First 5 Yuba supported FFN caregivers through the Caregiver Café and strengthened the early childhood workforce by training providers to use the Ages and Stages Questionnaire (ASQ).

“

I have been attending the Café for 4 years and I look forward to it. It gives me a space to be around other grandmothers and moms who are going through similar experiences or hear about how their situations with the kids they look after is different. It gives me an opportunity to talk about things without judgement....Caregiver Café has given me the confidence in knowing that I am doing the best that I can with my grandkids to help them grow.

They are both looking towards the upper right of the frame. The background is blurred, showing blue and orange elements.

Goal Area 4:

STRONG SYSTEMS

Building Resilient Families Tobacco Grant

Since launching in 2020, the Building Resilient Families Tobacco Grant has strengthened tobacco prevention efforts across Yuba County's health and family-serving systems. FY 2024–25 marked a year of meaningful consolidation and community-led momentum. The examples of this year's efforts below illustrate how the initiative's long-term relationship-building and capacity development have begun to take root, enabling partner organizations to carry forward tobacco-related protocols and outreach even as the grant enters its final phase.

Key efforts included:

Integrated Screening Practices

Home visiting staff and clinic partners continued to integrate tobacco screening and referral practices into their daily workflows, supported by newly translated educational materials.

Parent Ambassador Leadership

Parent Ambassadors, trained in tobacco advocacy and public comment practices, played an increasingly visible role by sharing secondhand smoke materials at First 5 events and modeling how trusted community members can influence health behaviors.

Materials Translated

Translated educational materials in Spanish and Hmong made conversations more accessible for diverse families.

Toolkit Developed

A 42-page Tobacco Prevention Toolkit was developed to support organizations with readiness assessments, implementation checklists, and staff training materials.

Prevention Practices Adopted

Casa de Esperanza, a local domestic violence shelter, implemented smoke-free campus policies, added third-hand smoke testing kits, and updated signage to reflect culturally relevant prevention messages.

The Building Resilient Families Tobacco Grant strengthens countywide tobacco-prevention systems through training, outreach, culturally relevant materials, and screening practices.

Trauma-Responsive Leadership

First 5 Yuba, in partnership with Yuba County Health and Human Services Department (HHSD), hosted the Trauma-Responsive Leadership conference bringing together community members and professional from multiple sectors. The conference offered trainings on trauma-informed principles, such as building mutually respectful and trusting relationships. Attendees engaged in presentations, discussions, networking, and resource-sharing designed to build a more trauma-responsive local system.

Attendees found the conference valuable and reported a strong, positive experience.

85% of attendees rated the conference as excellent

85% of attendees said they would recommend the conference to their colleagues

After the conference, participants joined a year-long leadership cohort that combined in-person and virtual learning, small group sessions, and access to tools and videos for each of the trauma-responsive principles. Participants practiced applying the principles in their supervision practices and organizational routines.

100% of participants increased their knowledge of how to transform systems using trauma-responsive practices

Home Visitation Systems Coordination Grant

First 5 Yuba served as the lead agency for the successful Bi-County Home Visiting Collaborative, which is dedicated to creating a coordinated and sustainable local home visiting system that reaches more families and improves service effectiveness. Through the Home Visitation Systems Coordination grant, First 5 Yuba supported home visitors with training, wellness resources, and professional development. In addition, First 5 Yuba continued to strengthen the Parent Ambassador group “The Momigas” by engaging members in ongoing leadership and advocacy training and hiring a new Parent Ambassador staff member. In addition to its systems-level work, the grant served as an overarching funding umbrella that supported Stepping with Baby, Parent Ambassadors and Professional Learning Communities.

Key efforts included:

Workforce Development and Support

First 5 Yuba provided a wide range of wellness and workforce-development opportunities for home visitors, including:

- A regional summit
- Personal safety and protection training
- CPR certification
- Leadership development
- Self-care courses
- Tools and resources to strengthen home visitors’ ability to support families

Parent Ambassador Group “The Momigas”

Parent leaders were offered development opportunities such as:

- Evidence-informed curriculum training
- Online advocacy and leadership courses, including those offered through the Family Advocacy and Mentoring Network (FAM-Net)
- In-person conferences
- Structured self-reflection activities

In January 2025, First 5 Yuba filled a staff position with an outstanding member of the Parent Ambassador team. This local leader had demonstrated significant growth in leadership, early childhood knowledge, and professional skills, along with a strong passion for serving Yuba County families. Her dedication and expertise made her a natural addition to the First 5 Yuba team.

The cross-county Home Visitation Systems Collaborative promotes shared learning, capacity building, resource sharing, and professional expertise to strengthen local home visiting system-change efforts.
